Switch models are available with the LAN base or the base IP base function. The Cisco Catalyst 3750-X and 3560-X Series Series switches are an enterprise-class line of stackable and standalone switches, respectively. Cisco standard PoE and two SFP uplinks and an integrated wireless LAN controllerThe Cisco Catalyst 3750 series is available with the IP Base image or IP Base Image Services image. The feature set IP Base image includes enhanced Quality of Service (QoS), throttling, access control lists (ACLs), static routing, Routing Information Protocol (RIP) and EIGRP routing stub functionality. This new series of products represents the next generation of desktop switches and includes Cisco StackWise, a 32 Gbps stack interconnect that allows customers to create a highly resilient AAswitch switching system at once. Cisco Catalyst Figure 1 Switch Cisco Catalyst Series 3750 for access and aggregation 10/ 100 and 10/100/1000 All contents are Copyright A@ 1992A2003 Cisco Systems, Inc. In addition, the Cisco Catalyst Series 3750 A^ optimized for high density Gigabit Ethernet installations. It includes a variety of switches that meet the requirements for access, aggregation, or connectivity backbone of small networks. Figure 1. The Cisco Catalyst 3750 v2 series consumes less power than its predecessors and A^ the ideal access level for corporate, retail and branch environments, as A^ increases productivity and investment protection by enabling a unified network for data, voice, and video. This series of products includes Cisco StackWiseA^ technology, a 32 Gbps stack interconnect that allows customers to build a unified and highly resilient, one switch at a time. These switches provide scalability, safety, energy efficiency and operating facilities with innovative features such as Cisco StackPower (only on the Catalyst 3750A e a e A e A x), IEEE 802.3AT Power Over Ethernet Plus (PoE +), optional network modules, redundant power supplies MEDIA ACCESS CONTROL SECURITY (MACSEC) functions. The IP service feature set is available as an update option when ordering or a license later. Data Sheet Image from: Displays the endless warning for Cisco Catalyst series 3750 switches. These switches provide high availability, scalability, safety, energy efficiency and operating facility with innovative features such as Cisco StackPower, Power over Ethernet Plus (PoE +) IEEE 802.3AT (PoE +) configurations, optional network modules, redundant power supplies and MacSec functions (Media Access Control Security). Main features of Cisco Catalyst Series 3750-X and 3560-X: 24 and 48 models 10/100/1000 POE +, Non-POE, 12 and 24 SFP Ge24 port models and 48 models 10/100/1000 UPOE with Eee support (Energy Efficient Ethernet) Four optional UPLINK network modules with GE or 10GEFRIME POE + doors with 30W power supply on all ports in a rack unit form factor (RU) Dual access, modular power supplies and redundant media hardware-based encryption based on Hardware Control Security (MacSec) Hardware Netflow Hardware Encryption and Switch-to-Switch with the UPLINKOPEN SHORTEST PATH FIRST (OSPF) service module for access to the IPv4 base image and IPv6 routing, multicast routing, QoS (Advanced Quality of Service) and characteristics of Safety in Limited Hardware Advanced Waist (LLW) with early hardware replacement within the next business day (NBD) and 90-day access to the support of the Cisco Technical Assistance Center (TAC) essay Cisco EnergyWise to optimize operational costs by measuring the actual power consumption of PoE devices, and reducing energy across the networkUSB Type-A and Type-B ports for storage and console restively and an out-of-band Ethernet management port In addition to the above features, the Cisco Catalyst 3750-X switches also offer: Cisco StackPowerA^A^A technology: An innovative feature and industry first for sharing power among stack membersCisco StackWise Plus technology for ease of use and resiliency with 64 Gbps of throughputInvestment protection with backward compatibility with all other models of Cisco Catalyst 3750 Series Switches Switch Models and Configurations: All switch models can be configured with four optional network modules. In addition, the Cisco Catalyst 3750 Series is optimized for high-density Gigabit Ethernet deployments and includes a diverse range of Cisco Systems, Inc. Download Cisco Catalyst 3750 Series Switches Data Sheet.pdf Download Cisco Catalyst 3750 Series Switches Quick Look.pdf Cisco Catalyst 3750 v2 Series Switches Data Sheet Download Cisco Catalyst 3750 v2 Series Switches Data Sheet.pdf The CiscoA@A CatalyStA@A 3750 v2 Series Switches are next-generation energy-efficient Layer 3 Fast Ethernet stackable switches. Switches eA^A^A technology, Page 1 of 18 switches that meet access, aggregation, or small-network backbone-connectivity requirements. In addition to the above features, the Cisco Catalyst 3750-X switches also offer: Cisco StackPowerA^A^A technology: An innovative feature and industry first for sharing power among stack membersCisco StackWise Plus technology for ease of use and resiliency with 64 Gbps of throughputInvestment protection with backward compatibility with all other models of Cisco Catalyst 3750 Series Switches Cisco Catalyst 3750-X and 3560-X Series Switch Configurations All switch models can be configured with the optional four GbE or two 10 GbE network module. module.
